

# Make LOPT Your First Choice for Total Knee Rehabilitation

## Your Patients Will Appreciate the Difference

While many physical therapy facilities offer knee rehabilitation by trained therapists, LOPT offers more. The added advantages at LOPT will be appreciated by your patients, which will impact their compliance and the overall healing process.

### Experience

Our therapists have many years of experience and can relate to the trials of total knee replacement.

### Medicare Assignment

LOPT is sensitive to the financial cost of health care, especially for senior citizens. That is why we accept Medicare assignment.

### Home Rental Units

We have a cold compression device available to your patients post-operative on a rental basis. Our rental rates are 50% less than hospital fees. We also save your patients money by renting equipment on a sliding fee scale when needed.

### Specialized Knee Contraction Equipment

When a patient has difficulty regaining full range of motion, especially knee extension, we have the latest equipment to assist their complete recovery. Our knee extension machine will help your patients regain range of motion through prolonged low load stretching. It can be used at home at no additional expense to the patient.

### Wii Rehabilitation

LOPT clinics offer Wii rehabilitation, a combination of balance and strengthening exercises for the lower extremity that has been well received by patients, especially seniors.

### Supportive Community Environment

Each LOPT clinic has a relaxed and friendly environment. We have many senior clients.

### Convenient Locations and Parking

We have three convenient locations across the city. Your clients can park directly in front of the entrance of each office.

## We're all about helping people improve their quality of life.
